

# Focus Timer Reborn Basic Info

## Basic application description

**Focus Timer Reborn** is Android and web application helping user to keep focus at work. It can support people used to working using Pomodoro Technique ([https://en.wikipedia.org/wiki/Pomodoro\\_Technique](https://en.wikipedia.org/wiki/Pomodoro_Technique)).

Application shares session info between Android application and web frontend so you can start session at web and finish it on the phone and vice versa.

Android application also shows nice log and your productivity statistics.

Application is provided for free with no ads. Future versions may get some extra premium but what is free in free version will be free forever.

## Cool features

- Application stores data in the cloud so you never lose any data you recorded
- Modern user interface based on Material Design Guidelines
- Nice stats. You can see how you are doing.
- You can update recorded data manually (eg. if you forgot to measure something). You can delete sessions you recorded by mistake.
- Application functionality is provided for free
